Event Safety Proposal

Event name: Boffer Construction
Event Location: East Campus Talbot Lounge
Event Coordinator: Ben Shaya (bshaya@mit.edu)

Event Description: Boffers are foam weapons used for mock sword fighting. We will be making them out of light weight PVC pipe, foam pipe insulation, and duck tape.

Safety Precautions:

- The event leader will inspect the prefrosh’s creations for safety, ensuring that the PVC is completely covered with foam and that the foam is well secured.
- The boffer battle will happen in a controlled environment. We will stay inside of the courtyard, and we will supervise the prefrosh to make sure things don’t get out of hand. It will be playful, not violent.
